- The World's Best Alternative -

Nordan Marine - Cooling Compressors Service

Nordan Marine qualified Service Engineer have years of experience with Cargo Cooling Compressor service on a variety of different Gas Carriers. Nordan Marine one-company solution meets our customers' needs for service of Cargo pumps, Safety Relief Valves, Calibration and Cooling Compressor.

Nordan Marine offers the service and repair of Reliquefaction Unit. We can offer you both preventive maintenance and repair of the Reliquefaction Plants.

Nordan Marine Service Engineers have extensive knowledge and experience with not only the services and repairs on the Cooling Compressors, but also the entire Reliquefaction plant.

Nordan Marine provides following service:

- Inspection – Pre docking
- Super Cargo attendance
- Pressure testing
- Mechanical troubleshooting
- Process Engineering
- Troubleshooting of the automation
- Mechanical Overhauling
- Compressor Valves exchange program
- Spare Parts

Spare Parts

Nordan Marine offers a wide range of spare parts; our spare parts are at very competitive price. We carry a large stock of common spare parts, and have a very close relationship with our sub-suppliers and can therefore offer short delivery times ensuring your Cargo Cooling compressor perform with optimal capacity.

Laser Alignment

In order to achieve optimum efficiency from your pump and reduce wear and tear, the shaft must be aligned correctly. A Laser Alignment from Nordan Marine helps you to extend your-service life of the electrical motor and bulk-head seal.

Nordan Marine technicians have the experience and the equipment to help ensure problematic alignment issues are resolved efficiently and effectively.

Benefits of Precision Alignment:

- Reduced energy consumption
- Reduced vibration levels
- Lower noise levels
