Pre-docking inspection

In order to reduce unplanned downtime and unforeseen cost, a Pre-docking inspection is an invaluable service to have. After a thorough inspection, we will issue a detailed report that consists of evaluation of the condition of the cargo equipment, estimation of coming dry-docking service cost and a list of spare parts that need to be renewed.

Calibration service

Nordan Marine's calibration technicians are educated within electronic field. Calibration service report and certificates will be provided after the calibration assignment.

The scope of calibration service

- Level gauges
- Pressure transmitters and gauges
- Temperature transmitters and gauges
- Gas detection system

Services and Repairs of Safety Relief Valves

Upon completion of the overhaul, a new certificate and detailed service report will be issued to the vessel in order to be verified by classification societies and other interested parties.

Nordan Marine offers:

- Pilot operated safety valves
- Conventional spring type safety relief valves
- Conventional P/V valves
- Cargo handling valves and actuators

Original spares

Nordan Marine works closely with makers and we provide original spare parts.

For our customers' convenience and short delivery time, we always keep the most common SRV spares in our warehouse.

Certificates from makers

Nordan Marine is trained and certified by makers such as Flowsafe, Korval and Leser and we are approved to provide sales and services of safety relief valves and spare parts.

Our service engineers who provide services on LNG vessels are trained onsite as well as with makers' official training courses.

Services and Repairs of Submerged pumps

Nordan Marine offers service engineer to inspect, repair and overhaul submerged pumps on LNG gas carriers.

We offer submerged pump's service to following brands such as:

- Ebara
 - Shinko
 - Nikisso
- among others.
